Needs and Uses: In order to determine which carriers are entitled to universal service support, all rate-of-return regulated (rate-of-return) incumbent local exchange carriers (LECs) must provide the National Exchange Carrier Association (NECA) with the loop cost and loop count data required by section 54.1305 for each of its study areas and, if applicable, for each wire center as that term is defined in 47 CFR part 54. See 47 CFR 54.1305 and 54.5. The loop cost and loop count information is to be filed annually with NECA by July 31st of each year, and may be updated occasionally pursuant to section 54.1306. See 47 CFR 54.1306. Pursuant to section 54.1307, the information filed on July 31st of each year will be used to calculate universal service support for each study area and is filed by NECA with the Commission on October 1 of each year. See 47 CFR 54.1307. An incumbent LEC is defined as a carrier that meets the

definition of “incumbent local exchange carrier” in section 51.5 of the Commission's rules. See 47 CFR 51.5.

In March 2016, the Commission adopted the Rate-of-Return Reform Order to continue modernizing the universal service support mechanisms for rate-of-return carriers. The Rate-of-Return Reform Order replaced the Interstate Common Line Support (ICLS) mechanism with the Connect America Fund—Broadband Loop Support (CAF-BLS) mechanism. While ICLS supported only lines used to provide traditional voice service (including voice service bundled with broadband service), CAF-BLS also supports consumer broadband-only loops. In March 2016, the Commission adopted the Rate-of-Return Reform Order to continue modernizing the universal service support mechanisms for rate-of-return carriers. The Rate-of-Return Reform Order replaced the Interstate Common Line Support (ICLS) mechanism with the Connect America Fund—Broadband Loop Support (CAF-BLS) mechanism. While ICLS supported only lines used to provide traditional voice service (including voice service bundled with broadband service), CAF-BLS also supports consumer broadband-only loops. For the purposes of calculating and monitoring CAF-BLS, rate-of-return carriers that receive CAF-BLS must file common line and consumer broadband-only loop counts on FCC Form 507, forecasted common line and consumer broadband-only loop costs and revenues on FCC Form 508, and actual common line and consumer broadband-only loop costs and revenues on FCC Form 509. See 47 CFR 54.903(a).

In December 2018, the Commission adopted the December 2018 Rate-of-Return Reform Order to require rate-of-return carriers that receive Alternative Connect American Model (A-CAM) or Alaska Plan support to file line count data on FCC Form 507 as a condition of high-cost support. Historically, all rate-of-return carriers received CAF BLS or, prior to that, ICLS, and were required to file line count data on FCC Form 507 as a condition of that support. In recent years, some rate-of-return carriers have elected to receive A-CAM I, A-CAM II, or Alaska Plan instead, and those carriers were not required to file line count data because the requirement to file applied only to rate-of-return carriers receiving CAF BLS. In order to restore a data set that the Commission relied on to evaluate the effectiveness of its high-cost universal service programs, the Commission revised its rules in that Order to require all rate-of-return carriers to file that data. While carriers receiving CAF-BLS must file the line count data on March 31 for line counts as of the prior December 31, the A-CAM I, A-CAM II, and Alaska Plan carriers will be required to file on

July 1 of each year to coincide with other existing requirements in OMB Control No. 3060-0986.
